SUPPLEMENT TO
REPORT NO.

25X1X

The following is a tabulation of rail fuel shipments entering and leaving East Germany from 1 through 30 June 1953. The tabulation is based on reports furnished by sources of varying degrees of reliability, who obtained their information from official railroad records and through personal observation. All the shipments listed were included in previous reports on rail traffic through East German border stations. As far as possible, double reporting of shipments was eliminated. The tabulation is incomplete, because some sources did not submit reports for several days.
